e-TOUCH EVO Micro-percussion marking gun

Competitive, Light, Portable

The **e-TOUCH EVO** is an all-in-one portable touchscreen marking machine that is economical, compact, and lightweight (2.2 kg).

This marking gun has **three interchangeable support surfaces** that can be changed without tools, allowing it to adapt to all marking configurations. Its tungsten carbide stylus ensures precise, reliable, and durable marking of your text, logos, or Datamatrix codes.

The touchscreen, which can be operated with or without gloves, allows you to create your marking files quickly and easily.

The 8 key SIC MARKING services

Personalized advice for the best choice of technology
Laser, micro-percussion or scribing? Our experts will help you identify the marking technology best suited for your requirements, thanks to our wide range of solutions.

Customized solutions tailored to your needs
We develop customized products that are perfectly adapted to your industrial processes and requirements.

Feasibility studies and technical tests
We carry out rigorous feasibility studies and tests to validate each stage of your project. Engineering tests are also available.

Complete training for your teams
Our specialists train your teams in the use of your equipment to ensure autonomous and effective control.

Assistance during commissioning
Our local teams are on hand to support you during the commissioning of your machine, facilitating smooth and rapid integration into your day-to-day operations.

Technical support and after-sales service
Responsive after-sales service and dedicated technical support members are at your side for assistance for the supply of spare parts and consumables.

Retrofit solutions for sustainable performance
We offer customized retrofit solutions to extend the life of your machines: backward compatibility with updated components, complete modernization or equipment takeover.

Global support with local expertise
With 10 subsidiaries and a worldwide network of distributors, we offer global resources combined with local support to take charge of your projects from design to installation.
