

EME FRESHCARE® labeler

The EME Freshcare® dispensers are based on the latest technology, use the newest microprocessors and a powerful stepper motor. They meet the highest requirements on speed and accuracy and are easy to operate. The stepper motor with micro step driver, gives accurate labeling, with an almost silent performance.

Easy operating

The operator keypad with its illuminated display, is an integral part of the dispenser and gives the operator easy access to all the smart functions and controls in a wide range of languages. The internal memory allows storage of all settings for each type of label, reducing start up and change over time.

Series

The EME dispensers are available in various sizes and in right or left hand versions. Various suspensions are available: to assemble the dispenser on the flowpacker or to install the dispenser just beside it. The intelligent processor with optional encoder, can vary the speed of the dispenser, to follow the speed variations of products and packing machines.

Options

Optionally, the dispenser can be equipped with:

- an encoder
- an external control panel
- a frame to assemble dispenser on flow-packer
- a stand for installing besides the packing machine

Services

Stepper motor with microstep	Yes
Microprocessor with keyboard	Yes
Illuminated display	Yes
Password protection	Yes
Internal memory capacity	45

Specifications

Label roll diameter maximum	Ø 410 mm
Label roll core, minimum	40 mm
Weight	20 kg
Power	230VAC, 50/60 Hz
Speed	0 - 35 m/min
